

What have we been learning?

Week beginning: 15th January 2024

This week in art we have started creating our own rainbow fish using watercolour paint. We chose which colours we wanted to use to make our fish colourful and unique. We made sure we were careful to stay within the lines with the watercolour paint. We added glitter to some of the scales to make them extra special!

This week in music we have been learning to use instruments to the beat of 'A Sailor went to Sea', which we have learned in class. We have really enjoyed learning this song!

During our understanding of the world lessons have been learning about what an underwater environment is. We have learned that an underwater environment is somewhere which is completely surrounded by water e.g. a lake, pond, river or the sea.

How can you help your child with their learning?

- Please ensure your child arrives at school before 9am. Our gate is open from 8:40am for early morning work. If your child arrives after 9am, they miss part of their phonics lesson, which unsettles them. Phonics is their most important lesson of the day. Thank you for your help with this.
- Next week in maths we are learning about capacity. Help your child use the words full, empty, nearly full and nearly empty. Speak about how full your glasses of water are at home, you could also have a teddy bear's picnic and speak about all the different glasses and how much each teddy has drank.
