

What have we been learning?

Week beginning: 9th June 2025

In maths we have been learning to share equally. This is the beginning of learning how to divide. We have been learning to make sure that each person has the same amount of objects. We then know that the objects have been shared equally. We had a lovely teddy bear's picnic on Wednesday and all took turns to share out food between 4 children.

I know that the apples have been shared equally because the elephant and the tiger both have 2 apples each.

On Monday we went to the London Transport Museum. We had a great time looking at past and present modes of transport. Thank you very much to all of the parents that supported on this trip :)

How can you help your child with their learning?

- Our new topic is journeys and transport. Talk to your child about different types of journeys and transport. Discuss long journeys, which may need a train or bus, or a short journey, which you could walk or cycle to. Talk about past journeys and experiences that you have had together.
