

What have we been learning?

Week beginning: 16th June 2025

We have been learning all about different types of journey and what mode of transport we would use for a long journey e.g. an journey overseas, or a short journey e.g. from school to Kilburn Library. We discussed with our partner which mode of transport we could use and why.

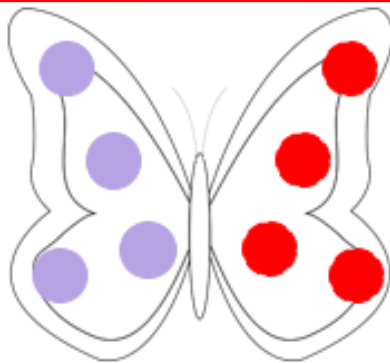

Our beautiful butterflies finished hatching over the weekend! When we got back to school on Monday, they were ready to fly. We enjoyed watching them fly away on their new adventure :) We have been learning about all about the butterfly life cycle. Ask your child to tell you what happens in the life cycle.

Painted Lady Butterfly

This week in maths we have been learning how to find the double of a number. A double means twice as many. We have been making sure that the same amount of dots are on both sides of the butterfly's wings to make sure that it was double.

$$4 + 4 = 8$$

Double 4 is 8.

How can you help your child with their learning?

- Please help your child with their letter formation homework. It is important that they start at the top of the letter, their letters are neat, facing the right way, and sitting in the right place on the line.
- Ask your child to write a sentence using the High Frequency Words in the 'Look Write Cover Check' part of their homework. This will help them to remember the word in context.
