

What have we been learning?

Week beginning: 30th June 2025

As part of our learning about journeys and transport, we explored different ways of travelling on water. We have been discussing types of water transport. We did an experiment, and tried putting different types of vehicles in the water to see whether they floated or sunk. We voted whether we thought the vehicle would float or sink, and made predictions.

How can you help your child with their learning?

- Over the next couple of weeks we are going to be learning about maps and positional language (e.g. under, over, through, on top, behind). Talk to your child about their journey to school. How do they get to school? What transport do they use? What do they see on the way? Library, park, train station, bus stop, shops etc.
