

# What have we been learning?

Week beginning: 9th March 2026

In maths this week we have been learning about the numbers 9 and 10. We have been learning all of the different ways to make both numbers.

This week we have been beginning to learn about Road Safety. We have learned a song that tells us to STOP, LOOK, LISTEN AND THINK before we cross a road. We spoke about how important it is that we hold an adults hand when crossing the road.

## How can you help your child with their learning?

- Please help your child with their letter formation homework. It is important that they are always starting at the top of the letter, the letters are neat, and facing the right way.
- Practise crossing the road safely with your child, encouraging them to stop, look, listen and think every time they cross a road. Discuss with your child when it is safe to cross, and when it is not safe to cross the road.
