

# What have we been learning?

Week beginning: 23rd March 2026

This week we have been continuing to learn about growing. We have learned that things are living if they grow—such as plants, animals and humans. We have been learning the different parts of a plant and their functions, how a seed grows into a plant, and what a plant needs in order to grow: sunlight, water, and nutrients. We have all planted our own cress seeds, we cant wait to watch them grow!

I know that my cress plant needs sun, water, and soil to grow.

This week in RE we have been continuing to learn about Holy Week.

**Palm Sunday**—Jesus rides into Jerusalem.

**Maundy Thursday**—The Last Supper.

**Good Friday**—Jesus died on the cross because he loves us.

**Easter Sunday**—Jesus rose again.

Hosanna!

## How can you help your child with their learning?

- Help your child to look after their cress plant, and talk about the different parts of a plant and what their purposes are e.g. the roots are for taking the nutrients and water to the plant, and for holding it in the ground.
- Speak to your child about Easter, and why it is the most important of the Christian holidays as it was the day that Jesus rose again. Speak to them about why we have Easter eggs which reminds us that Easter is a time for new life. We wish you all a happy and Holy Easter :)
