

What have we been learning?

Week beginning: 11th May 2026

This week we have been learning how to add and take away numbers within 10. We have been using number stories and ten frames to help us add more to a group, or take away from a total number.

First, there are 8 characters.

Then, 2 chickens want to jump in the boat.

Now, we have 10 characters altogether.

$2 + 8 = 10$

In music we have been practising for the summer concert. We can't wait to show you what we have been learning! The summer concert is on the 26th June at 2pm :)

How can you help your child with their learning?

- Make up number stories with your child using teddy bears or pasta shapes. Start with a number e.g. 3. Add more e.g. 2. Then ask your child how many altogether? You can do the same for taking away. Start with a number e.g. 10, take some away, e.g. 2, then ask your child how many are left.
- When you are outside, keep a look out for minibeasts! Ask your child what type of minibeast they can see—a fly, ladybird, spider, etc. Ask your child questions—how many legs does it have? How many eyes does it have? What does it eat?
